

SUSTAINABILITY REPORT

Reporting period: 01.01.2024 – 31.12.2024
Prepared by: Jaka Žvan, Director
Date: 11 June 2025

ENVIRONMENTAL PERFORMANCE

ENERGY CONSUMPTION

Comparison:

2023:
41,050 kWh total – 12.1 kWh/guest night – 9.2 t CO₂e

2024:
38,920 kWh total – 11.3 kWh/guest night – 8.5 t CO₂e

What worked well:

Installation of LED lights and optimized guest communication contributed to lower energy consumption.

Recommended improvements:

Install smart sensors and continue guest education.

WATER CONSUMPTION

Comparison:

2023: 2,790 m³ – 0.82 m³/guest night

2024: 2,485 m³ – 0.72 m³/guest night

What worked well:

Information labels in rooms, improved guest instructions and low-flow shower heads.

Recommended improvements:

Install additional flow regulators and monitor per-chalet usage.

SOLID WASTE DISPOSAL

Comparison:

2023:
2,130 kg total (mixed), 1,120 kg recycled, 120 kg compost

2024:
1,960 kg total (mixed), 1,460 kg recycled, 150 kg compost

What worked well:

Color-coded labeling system and guest education improved separation.

Recommended improvements:

Continue improving kitchen workflows and composting options.

TOTAL EMISSIONS

2023: 9.2 t CO₂e / 2.72 kg CO₂e per guest night

2024: 8.5 t CO₂e / 2.47 kg CO₂e per guest night

PROGRESS TOWARDS GOALS

Goal: Reduce GHG emissions by 5%

Achieved (reduction of 7.6%)

Goal: Improve biodiversity

Ongoing.

New measurable action: maintain 1,500 m² of pasture in Ukanc and install 1 bee hive by Sept 2025.

Goal: Reduce water usage by 3%

Achieved (reduction of 10.9%)

Goal: Improve recycling rate by 20%

Achieved

OTHER PROGRESS

Digital guest communication system via WhatsApp reduced printing and improved check-in experience.

OTHER RECOMMENDATIONS

Introduce biodiversity monitoring program in partnership with local schools or NGOs.

SENIOR MANAGEMENT APPROVAL

Signed:
Jaka Žvan

Date:
10 June 2025
